MATHEMATICS
4048/01
Paper 1
Wednesday 18 August 2021
2 hours
Candidates answer on the Question Paper.

## READ THESE INSTRUCTIONS FIRST

Write your name, class and register number on all the work you hand in.
Write in dark blue or black pen.
You may use a pencil for any diagrams or graphs.
Do not use staples, paper clips, highlighters, glue or correction fluid.
Answer all questions.
If working is needed for any question it must be shown with the answer.
Omission of essential working will result in loss of marks.
You are expected to use a scientific calculator to evaluate explicit numerical expressions.
If the degree of accuracy is not specified in the question, and if the answer is not exact, give the answer to three significant figures. Give answers in degrees to one decimal place.
For $\pi$, use either your calculator value or 3.142 , unless the question requires the answer in terms of $\pi$.
At the end of the examination, fasten all your work securely together.
The number of marks is given in brackets [ ] at the end of each question or part question.
The total of the marks for this paper is 80 .

## Mathematical Formulae

Compound Interest

$$
\text { Total Amount }=P\left(1+\frac{r}{100}\right)^{n}
$$

## Mensuration

Curved surface area of a cone $=\pi r \ell$
Curved surface area of a sphere $=4 \pi r^{2}$

$$
\text { Volume of a cone }=\frac{1}{3} \pi r^{2} h
$$

$$
\text { Volume of a sphere }=\frac{4}{3} \pi r^{3}
$$

Area of triangle $A B C=\frac{1}{2} a b \sin C$
Arc length $=r \theta$, where $\theta$ is in radians
Sector area $=\frac{1}{2} r^{2} \theta$, where $\theta$ is in radians

## Trigonometry

$$
\begin{aligned}
& \frac{a}{\sin A}=\frac{b}{\sin B}=\frac{c}{\sin C} \\
& a^{2}=b^{2}+c^{2}-2 b c \cos A
\end{aligned}
$$

## Statistics

$$
\begin{aligned}
\text { Mean } & =\frac{\sum f x}{\sum f} \\
\text { Standard Deviation } & =\sqrt{\frac{\sum f x^{2}}{\sum f}-\left(\frac{\sum f x}{\sum f}\right)^{2}}
\end{aligned}
$$

1 Circle the irrational number/s from the list below.
$1.5 \pi$
2.3
$\sqrt{12.1}$
25.82

2 Simplify $\sqrt[3]{\left(\frac{a^{15}}{b^{6}}\right)^{-2}}$, leaving your answer in positive indices.

3 Given that one solution for the equation $\frac{1}{2 x^{2}+k x}=\frac{1}{2}$ is $x=-2$, find
(i) the value of $k$,

$$
\text { Answer } k=
$$

$\qquad$
(ii) a second possible value of $x$.

4 The diagram shows an isosceles triangle $A B C$ where angle $A B C=p^{\circ}$ and $B A=B C$. Point $X$ is such that angle $B C X=\frac{p^{\circ}}{2}$.

$D$ is the intersection of $A B$ extended and $C X$ extended.
John claims that $A D$ will form a diameter of a circle with centre $B$.
Determine whether John's claim is correct or not.
Answer

5 Given that $2 m-1=(2 n+3)^{2}$, where $n$ is a positive integer.
Show that $m$ is an integer.
Answer

6 The graph below shows the trend in the number of cases of people infected with the coronavirus in a particular country.

Source: Johns Hopkins University (CSSE)
Jamie claims that the trend shown is approximated by a linear equation of the form $y=320 x$, where $x$ is the number of days and $y$ is the number of infections.
Explain why she is wrong.

Answer $\qquad$
$\qquad$
$\qquad$
$\qquad$

7 There are 30 members in a community club.
All the members take up at least one activity, either aqua aerobics or pickleball.
There are 15 members who take up aqua aerobics and 24 who take up pickleball.
Given that $A=\{$ members who take up aqua aerobics $\}$ and
$P=\{$ members who take up pickleball $\}$
Indicate in the Venn Diagram below, showing clearly, the number of members in each subset.

8 The table shows part of a payment plan for Mr Lee who borrowed $\$ 50000$ from a bank when he bought a car.
The bank charges an interest of $2.5 \%$ per annum, calculated on a monthly basis.
Mr Lee pays $\$ 1000$ at the end of each month.

|  | Amount owed at <br> beginning of <br> month | Interest for the <br> month | Amount paid at <br> end of month | Amount <br> outstanding at <br> end of month |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
| Month 1 | $\$$ | $50,000.00$ | $\$$ | 104.17 | $\$$ | $1,000.00$ |
| Month 2 | $\$$ | $49,104.17$ | $\$$ | 102.30 | $\$$ | $1,000.00$ |
| Month 3 | $\$$ | $48,206.47$ |  | $a$ |  | $49,104.17$ |
| Month 4 | $b$ |  |  |  |  |  |

Find $a$ and $b$.

$$
\text { Answer } a=\$ \ldots-\ldots-\quad b=\$
$$

9 In the pentagon $A B C D E$ shown, angle $B A E=60^{\circ}$ and angle $B C D=45^{\circ}$.
$A E$ is parallel to $C D, E$ lies on $C B$ extended and $C E=D E$.

Find
(i) angle $C E D$,

Answer
Anser --------------------
(ii) angle $A B C$.

Answer
Given further that $C D=12 \mathrm{~cm}$,
(iii) find the area of triangle $C D E$.

10 A package will leave Australia on 19 August at 21:15, local time in Australia. The time taken for the package to arrive at Singapore is 6 hours 30 minutes. Australia time is 2 hours ahead that of Singapore time.
What is the date and time at which the package arrives in Singapore?

Answer
11 The picture shows a model terracotta warrior.

The model has height of 15 cm and weighs 20 grammes.
A similar terracotta warrior has a height of 1.8 metres. Find the weight of the larger terracotta warrior. Give your answer in kilogramme, correct to 1 decimal place.

12 (a) The price, $P$, of an object varies directly as the square of its height, $h$. The price is $\$ 3$ when the height is 20 cm .
Find the price when the height is 30 cm .

## Answer \$

(b) Given that $R$ varies inversely as the square of $T$, find the percentage change in $R$ when $T$ is doubled.

13 Factorise completely the expressions.
(a) $4(x-y)^{2}-9(x+y)^{2}$

Answer
(b) 10ax + 15ay - $8 b x-12 b y$

14 The diagram shows part of three regular polygons $A, B$ and $C$ fit together at a common vertex. Polygon $A$ is an icosagon, a 20 -sided polygon.

What is the special name for polygon $B$ ?

15 Given that $x_{1}, x_{2}, x_{3}, \ldots, x_{10}$ are 10 unique numbers whose mean, $\tilde{x}$, is 11.8 and standard deviation is 4.729 .

Find the value of
(i) $x_{1}+x_{2}+x_{3}+\ldots+x_{10}$

## Answer

(ii) $x_{1}^{2}+x_{2}^{2}+x_{3}^{2}+\ldots+x_{10}^{2}$, giving your answer to the nearest whole number.

## Answer

Each of the value of $x_{\mathrm{n}}$ is changed as follows:

> If $x_{\mathrm{n}}<\tilde{x}$, then $x_{\mathrm{n}}$ is decreased by 2 .
> If $x_{\mathrm{n}}>\tilde{x}$, then $x_{\mathrm{n}}$ is increased by 2 .
(iii) Explain clearly, how this would affect the value of the standard deviation.

Answer $\qquad$
$\qquad$
$\qquad$

16 The diagram shows four identical blades of a fan, whose centre is $O$. Arc $A B$ on the fan blade forms an angle of $\frac{\pi}{6}$ at the centre $O . O C$ is 5 cm and $B C$ is 25 cm .

(i) Find arc length $A B$.
(ii) Find the perimeter of the shape.
$\qquad$ cm

17 (i) Express $x^{2}+6 x+10$ in the form $(x+p)^{2}+q$, where $p$ and $q$ are constants to be found.

> Answer
(ii) Given that $y=x^{2}+6 x+c$, make $x$ the subject of the formula.

## Answer

18 The stem-and-leaf diagram shows the daily number of customers over a period of one month at Branch A of a Food Outlet.

|  | Branch A |  |  |  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1 | 0 | 7 | 8 | 9 | 9 |  |  |  |
| 2 | 0 | 1 | 2 | 5 | 5 | 7 | 7 |  |
| 3 | 3 | 3 | 3 | 4 | 8 | 9 | 9 | 9 |
| 4 | 1 | 1 | 2 | 5 | 6 | 7 |  |  |
| 5 | 2 | 3 | 4 | 4 |  |  |  |  |

Key: $\quad 4 \mid 1 \quad$ means 41 customers
(i) Write down the median of number of customers for Branch A .

Answer
(ii) Find the interquartile range for Branch A.

Answer
(iii) Another branch, Branch B, had a median of 27 customers and an interquartile range of 23 customers. The Food Outlet intends to expand only one of the two branches.
Which one of the two branches should be expanded?
Explain your choice clearly.
Answer $\qquad$
$\qquad$
$\qquad$

19 In the diagram, $A(1,2), B(8,5), C(13,7)$ and $D(13,2)$ are four points.

(i) Show that $A B+B C=13.0$, correct to 3 significant figures.

Answer
(ii) By finding $A C$, determine the sum of interior angles in figure $A B C D$, justifying your answer.

20 (i) Express 9801 as a product of its prime factors.
(ii) Hence, explain why 9801 is a square number.

Answer $\qquad$

(iii) $a$ and $b$ are both prime numbers.

Find the smallest value of $a$ and $b$ such that $9801 \times \frac{a}{b}$ is a perfect cube.

$$
\begin{equation*}
\text { Answer } a= \tag{2}
\end{equation*}
$$

$\qquad$ $b=$

21 The diagram shows three points $A(-16,0)$, $B(0,12)$ and $C(8,2)$.

(i) Find the equation of line $A B$, expressing your answer in the form $a x+b y+c=0$, where $a, b$ and $c$ are constants to be found.

## Answer

A circle is drawn with centre $C$ such that $A B$ is a tangent to the circle.
The perpendicular distance of a point $(p, q)$ from a line $a x+b y+c=0$ is given by the formula

$$
\text { Distance }=\frac{a p+b q+c}{\sqrt{a^{2}+b^{2}}}
$$

(ii) Using the formula above, determine the radius of the circle.

22 The diagram shows the positions of four checkpoints $W, X, Y$ and $Z$ in a jungle reserve area. The checkpoints are connected by the irregular tracks shown.

$X$ is due north of $Y$ and is on a bearing of $077^{\circ}$ from $W$.
Angle $X W Y=53^{\circ}$ and $W Y$ is 60 metres.
(i) Calculate the distance $X Y$.

Answer $\qquad$ m
(ii) Given that the bearing of $Y$ from $Z$ is $152^{\circ}$, write down the bearing of $Z$ from $Y$.
(iii) A hidden camera, $C$, is to be fixed at checkpoint $Y$ to capture animals that move from $W$ to $Y$ via $Z$, along the irregular track.
The camera has a view angle of $50^{\circ}$ and can capture anything within this angle. as shown in the diagram below.

By measurement, determine the minimum bearing where the line $C P$ must be pointed when the camera is fixed at point $Y$.

23 Points $P, Q$ and $R$ have coordinates $(1,1),(5,11)$ and $(9,1)$ respectively. $M$ is the midpoint of $Q R$.
(i) Find the coordinates of point $M$.

> Answer
(ii) State the gradient of line segment $P M$.

> Answer
(iii) "The line segment $P M$ bisects angle $Q P R$."

Determine whether the statement above is correct or not. Answer

24 The graph of $y=x^{2}-3 x-1.75$ is shown on the grids below.

(a) Write down the equation of the line of symmetry.
Answer
(b) Draw the line representing $4 y=7 x-16$ for $-1 \leq x \leq 5$ on the grids.
(c) Using the graphs and showing your working clearly, find the solutions of the equation $4 x^{2}-19 x+9=0$.

\end{aligned}
$$

## Answer all questions.

1 (a) Write as a single fraction in its simplest form.
(i) $\frac{3 t^{2}}{w} \div \frac{9 t^{2}}{w^{3}}$
Answer
(ii) $\frac{3}{y-1}-\frac{5}{y+6}$
$\qquad$
Answer
(b) Simplify $\frac{2 v^{2}-5 v-12}{16-v^{2}}$

2 In stall A, one Chicken pie costs $\$ 1.50$, one Mushroom pie costs $\$ 1.30$ and one Tuna pie costs $\$ 1.80$. In stall B, one Chicken pie costs $\$ 0.20$ more, one Mushroom pie costs $\$ 0.30$ less and one Tuna pie costs $\$ 0.10$ less.
The information can be represented by the matrix $\mathbf{P}=\left(\begin{array}{ccc}\mathrm{C} & \mathrm{M} & \mathrm{T} \\ 1.5 & 1.3 & 1.8 \\ 0.2 & -0.3 & -0.1\end{array}\right)$ Stall A
(a) Simon buys 50 Chicken pies and 20 Tuna pies.

Ivy buys 40 Chicken pies, 20 Mushroom pies and 30 Tuna pies.
Represent their purchases in a $3 \times 2$ Matrix $\mathbf{Q}$.

$$
\text { Answer } \mathbf{Q}=
$$

(b) Evaluate the matrix $\mathbf{R}=\mathbf{P Q}$.

$$
\text { Answer } \quad \mathbf{R}=
$$

(c) Use your answer in (b) to explain whether it is better for Simon to buy from stall A or stall B. Answer

Stall $\qquad$ because $\qquad$
(d) Stall B has a promotion of $30 \%$ off on all pies while prices of pies in stall A has increased by $10 \%$.
Using your answer in (b) or otherwise, calculate the lowest total amount both Simon and Ivy will pay for the pies.

## Answer \$

3 (a) In the parallelogram $P Q R S, Q R=12.7 \mathrm{~cm}$ and angle $P Q R=50^{\circ}$.

The area of the parallelogram is $52.6 \mathrm{~cm}^{2}$.
(i) Show that the length of $R S=5.407 \mathrm{~cm}$.

Answer
(ii) Hence or otherwise, calculate the length of the longer diagonal of the parallelogram $P Q R S$.
(b) In the diagram, the points $A, B, C$ and $D$ lie on a circle, centre $O$. $\angle A D C=118^{\circ}$ and $\angle B A O=32^{\circ}$.

Find, giving reasons for each answer, (i) angle $A B C$,
(ii) angle $B C O$.

$A, B$ and $C$ are points on the circle centre $O$ and $A B=B C$.
$P$ is the midpoint of chord $A B$ and $Q$ is the midpoint of chord $B C$.
(a) Prove that triangle $O A P$ is congruent to triangle $O C Q$.

Give a reason for each statement you make.
Answer
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(b) Given that the radius of the circle is 6 cm and the obtuse angle $A O C=\frac{7 \pi}{9}$, calculate the shaded area.

5 (a) A cuboid has a volume of $250 \mathrm{~cm}^{3}$, correct to the nearest cubic centimetre. The height of the cuboid is 8.4 cm , correct to 1 decimal place.

Calculate the greatest possible base area of the cuboid.
$\mathrm{cm}^{2}$
(b) In the figure, $A C$ and $P Q$ are parallel lines. $P$ lies on $A B$ such that $A P: P B=1: 5$ and $R$ lies on $A C$ such that $A R: R C=3: 2$.

(i) Explain why triangles $A B R$ and $P B Q$ are similar. Answer
$\qquad$
$\qquad$
$\qquad$
$\qquad$
(ii) Show that the ratio of area of triangle $P B Q$ to the area of trapezium $A P Q R$ is $25: 11$.

Answer
(iii) If the area of the trapezium $A P Q R$ is $22 \mathrm{~cm}^{2}$, calculate the area of triangle $A B C$.
$\mathrm{cm}^{2}$ [3]

6 (a) The diagram shows a cylindrical container used to dispense coffee in a hotel.

The container has a height of 50 cm and a radius of 18 cm .
(i) Calculate the volume of the cylinder.

Answer
$\mathrm{cm}^{3}$ [1]
(ii) 25 litres of coffee are poured into the empty container.

Work out the height, $h$, of the empty space in the container.

Answer $h=$
cm [2]
(iii) Cups in the shape of a hemisphere of radius 3.5 cm are filled with coffee from the container.

Work out the maximum number of these cups that can be completely filled from the 25 litres of coffee in the container.

Answer
(b) A solid shape consists of a cube with a pyramid on top has a total height of $10 x \mathrm{~cm}$. The pyramid sits perfectly on one surface of the cube.

Each side of the cube is $6 x \mathrm{~cm}$.
Find an expression, in terms of $x$, for the surface area of the solid.
Give your answer in its simplest form.

$6 x$

7 Mabel wants to fence off some land as an enclosure for her chickens. The enclosure will be a rectangle with an area of $60 \mathrm{~m}^{2}$.

(a) The enclosure is $x \mathrm{~m}$ long.

Show that the perimeter of fencing, $P \mathrm{~m}$, required for the enclosure is given by

$$
\begin{equation*}
P=2 x+\frac{120}{x} . \tag{1}
\end{equation*}
$$

The table below shows some values of $x$ and the corresponding values of $P$ for the fencing.

| $x$ | 2 | 4 | 6 | 8 | 10 | 12 | 14 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| $P$ | $k$ | 38 | 32 | 31 | 32 | 34 | 36.6 |

(b) Find the value of $k$.

$$
\begin{equation*}
\text { Answer } k= \tag{1}
\end{equation*}
$$

(c) On the grid, plot the points given and draw the graph of $P=2 x+\frac{120}{x}$ for $2 \leq x \leq 14$.
(d) Mabel only has 35 m of fencing. Use your graph to find the range of values of $x$ that she can choose.

Answer
(e) Mabel would like to use the graph to estimate the length and width of the enclosure when it is a square. Suggest an equation of the straight line that Mabel should draw.

8 The table below shows part of Ahmad's personal income tax bill.

|  | S'PORE (\$) | $\begin{gathered} \text { OTHER } \\ \text { COUNTRIES (\$) } \end{gathered}$ | TOTAL (\$) |
| :---: | :---: | :---: | :---: |
| EMPLOYMENT TOTAL INCOME | $\begin{aligned} & 123,419.00 \\ & \mathbf{1 2 3}, 419.00 \end{aligned}$ |  | $\begin{aligned} & 123,419.00 \\ & 123,419.00 \end{aligned}$ |
| LESS: Approved Donations |  |  | 1,543.00 |
| ASSESSABLE INCOME |  |  | $p$ |
| LESS:PERSO  <br>  Earned I <br>  NS-man <br>  Life Insu | EFS | $\begin{array}{r} 1,000.00 \\ 1,500.00 \\ 19,318.00 \\ \hline \end{array}$ |  |
| TOTAL PERSONAL RELIEFS |  |  | $q$ |
| CHARGEABLE INCOME |  |  | 100, 058.00 |

(a) Calculate the values of $p$ and $q$.

Answer $p=$ $\qquad$

$$
\begin{equation*}
q= \tag{2}
\end{equation*}
$$

(b) The tax rate for the year is given in the table below.

|  | Chargeable <br> Income (\$) | Rate <br> (\%) | Gross Tax <br> Payable (\$) |
| :--- | :---: | :---: | :---: |
| On the first | 20,000 | 0 | 0 |
| On the next | 10,000 | 2.0 | 200 |
| On the first | 30,000 |  | 200 |
| On the next | 10,000 | 3.5 | 350 |
| On the first | 40,000 |  | 550 |
| On the next | 40,000 | 7.0 | 2,800 |
| On the first | 80,000 |  | 3,350 |
| On the next | 40,000 | 11.5 | 4,600 |
| On the first | 120,000 |  | 7,950 |
| On the next | 40,000 | 15 | 6,000 |

https://www.iras.gov.sg/irashome/Individuals/Locals/Working-Out-Your-Taxes/Income-Tax-Rates/
(i) Show that Ahmad's income tax payable is $\$ 5656.67$.

Answer
(ii) In the same year of tax assessment, Angie's income tax payable is 0.55 of Ahmad's. Angie claims that her chargeable income is also 0.55 of Ahmad's chargeable income. Do you agree? Support your stand with calculations.

9 Small triangles are formed by placing rods between dots as shown in the diagrams.

Diagram 1

Diagram 2

Diagram 3

Diagram 4
(a) Complete the table below.

| Diagram $n$ | 1 | 2 | 3 | 4 | 5 |
| :--- | ---: | ---: | ---: | ---: | :---: |
| Number of small triangles $(T)$ | 1 | 4 | 9 | 16 |  |
| Number of dots $(D)$ | 3 | 6 | 10 | 15 |  |
| Number of rods $(R)$ | 3 | 9 | 18 | 30 | 45 |

(b) Explain why it is not possible to have 1025 small triangles.
$\qquad$
$\qquad$
(c) Given that $R=D+T-1$, find the value of $n$ when $D=561$ and $R=1584$.

$$
\text { Answer } n=
$$

(d) A sequence is $1,3,6,10,15 \ldots$
(i) The $n$th term of the above sequence is $\frac{1}{2} n(n+1)$.

Write an expression for $R$ in terms of $n$.

Answer
(ii) How many rods are there in Diagram 16?
(e) Find an expression for $D$ in terms of $n$.

Answer

10 The masses of 40 oranges were measured.
The cumulative frequency curve below shows the distribution of the masses.

The box-and-whisker below shows the distribution of the masses of 40 apples.

(a) Use the two diagrams to complete this table for the two types of fruits.

| Type | Lower <br> quartile | Median | Upper quartile | Inter-quartile <br> range |
| :---: | ---: | ---: | ---: | :---: |
| Orange | g | g | g | 11 g |
| Apple | g | 126 g | g | 11 g |

(b) Describe how the cumulative frequency curve for the apples may differ from the curve for the oranges.
$\qquad$
(c) Below are two statements comparing the distributions of the masses of oranges and apples.

For each statement, write True or False. Give a reason for each answer, stating clearly which statistics you use to make your decision.
(i) The apples are heavier than the oranges.
$\qquad$ because $\qquad$
$\qquad$
(ii) A greater percentage of oranges weigh more than 131 g than apples.
$\qquad$ because $\qquad$
(d) The grouped frequency table for the masses of the oranges is given below.

| Mass $(m \mathrm{~g})$ | $105 \leq m<115$ | $115 \leq m<125$ | $125 \leq m<135$ | $135 \leq m<145$ |
| :---: | :---: | :---: | :---: | :---: |
| Frequency | 5 | 10 | 20 | 5 |

(i) Calculate an estimate of the mean mass.

> Answer
(ii) Calculate an estimate of the standard deviation.

> Answer
g [1]
(iii) 2 oranges are chosen at random without replacement.

Calculate the probability that at least one of the oranges weigh at least 125 g .

11 (a) On Monday, Dev goes on a 3.6 km run.
(i) His average speed for the first 1.2 km is $x \mathrm{~km} / \mathrm{h}$.

Simplify and write down an expression, in terms of $x$, for the time taken for the first 1.2 km .
$\qquad$
Answer
minutes
(ii) His average speed for the last 2.4 km of the run is $2 \mathrm{~km} / \mathrm{h}$ slower than the first 1.2 km .

Simplify and write down an expression, in terms of $x$, for the time taken for the final 2.4 km .

## Answer

minutes
(iii) Dev takes 25 minutes to complete the full 3.6 km run.

Form an equation in $x$ and show that it simplifies to $25 x^{2}-266 x+144=0$.
(iv) Solve the equation $25 x^{2}-266 x+144=0$, leaving your answers correct to 3 decimal places.

## Answer $x=$

(b) On Friday, Dev completed a 4 km run on the same average speed that he ran for the last 2.4 km of the 3.6 km run on Monday.

Calculate the time Dev took to run 4 km on Friday.
Give your answer in minutes and seconds, correct to the nearest seconds.

12 (a) On the map, 3 MRT stations, Braddell (NS18), Caldecott (CC17) and Toa Payoh (NS19) are joined to form a triangle.

On the map,
(i) construct the perpendicular bisector of the line connecting NS18 and NS19.
(ii) construct the angle bisector at NS18.
(iii) shade the region inside the triangle that is closer to the line joining NS18 and CC17 and is closer to NS18 than NS19.

John and Chieh, both Singaporeans, are looking at buying a re-sale unit in Toa Payoh. They found the following units below and marked them $\mathbf{A}, \mathbf{B}, \mathbf{C}$ and $\mathbf{D}$ on the map on page 22 .

| A | B |
| :---: | :---: |
| Blk 153 Toa Payoh Sapphire <br> \& Room • Model A <br> 101 sqm / \$770 psft(Built) <br> $\$ 838,000$ |  |
| C | D |
|  | Blk 116 Lorong 2 Toa Payoh <br> 3 Room - mproved <br> $63 \mathrm{sqm} / \$ 457$ psf(Built) <br> $\$ 310,000 \quad \bullet_{2}$ |

Adapted from: https://www.srx.com.sg/singapore-property-listings/hdb-for-sale

Note: sqm $=$ square metre $\left(\mathrm{m}^{2}\right)$
$\mathrm{psf}=$ per square foot (psf)
(b) Which unit is the most value for money? Explain.
$\qquad$
$\qquad$
(c) Both John and Chieh are first-time HDB applicants as a married couple, they want to purchase a unit that is closest to the MRT station. Their combined monthly income is $\$ 7500$ and they wish to complete financing their home in 15 years' time using the HDB loan.

John's friend, Janet, also Singaporean, is looking at purchasing unit $\mathbf{B}$, which is 2 km away from her mum's place, under the Single's scheme. Janet is 38 this year and her monthly salary is \$6500.

Assuming that they receive all the relevant grants and take up the maximum loan amount, suggest the number of years Janet should take to service the bank loan such that her interest paid is lower than John's and Chieh's.

Justify any decisions you make and show your calculations clearly.

Table 1: Comparison between HDB and Bank Loan

|  | HDB Loan | Bank Loan |
| :--- | :---: | :---: |
| Maximum loan | $90 \%$ of purchase price | $75 \%$ of purchase price |
| Interest Rate (p.a) | $2.6 \%$ | $1.8 \%$ |

Table 2: Grants that can be used to offset the purchase price of the flat
